OUR FLEET

ROTARY AIRCRAFT

Benefits of using helicopters are very obvious. Transport helicopters are used in places where the use of conventional aircraft is impossible. The landing possibilities of helicopter are almost unlimited. Transport helicopters are helicopters used by militaries with the primary purpose of transporting personnel (troops) and cargo. The benefit of using helicopters is that personnel and cargo can be moved to and from locations without requiring a runway for takeoffs and landings. Cargo is carried either internally, or externally by sling load where the load is suspended from an attachment point underneath the aircraft. Personnel are primarily loaded and unloaded while the helicopter is on the ground. However, when the terrain restricts even helicopters from landing, personnel may also be picked up and dropped off using specialized devices, such as rescue hoists or special rope lines, while the aircraft hovers overhead.

Show flight technical characteristics

Crew:	2 pilots, 1 navigator, 1 flight engineer, 1 flight technician
Capacity:	90 troops or 60 stretchers 20,000 kg cargo (44,090 lb)
Dimensions:	
Length:	40.025 m (131 ft 3¾ in) (rotors turning)
Rotor diameter:	32.00 m (105 ft 0 in)
Height:	8.145 m (26 ft 8¾ in)
Disc area:	804.25 m ² (8,656.8 ft ²)
Take-off weight:	
Empty weight:	28,200 kg (62,170 lb)
Loaded weight:	49,600 kg (109,350 lb)
Cabin:	20,000 kg (44,150 lb)
Under slung:	20,000 kg (44,150 lb)
Max. takeoff weight:	56,000 kg (123,450 lb))
Performance:	
Powerplant:	2 × Lotarev D-136 turboshafts, 8,500 kW (11,399 shp) each
Maximum speed:	295 km/h (159 kt, 183 mph)
Cruise speed:	255 km/h (137 kt, 158 mph)
Range:	1,920 km (1,036 nmi, 1,190 mi) (with 4 auxiliary tanks) 590 km (312 nmi, 366 mi) (no auxiliary tanks)
Ceiling, ISA:	Service 4,600 m (15,100 ft), Hover, OGE 1,520 m (4,987 ft)
